TECHNICAL SKILLS

Languages known

Java, Python

Web Application Development

HTML+ CSS+ JavaScript+Bootstrap+React.js+Next.js+PHP+Ajax+Jquery+Postgres

AWS Services Software

Qgis, Visual Studio, Android studio

PROJECTS

Autism Detection Using Machine Learning

Designed an AI-based diagnostic support system for early identification of Autism Spectrum Disorder using behavioral and clinical features. Applied preprocessing, feature selection, and classification models to achieve high screening accuracy and aid timely intervention.

SmartLane-An Embedded System for Violation Detection And Fine Automation

Designed and implemented SmartLane, an AI-powered lane violation detection system using YOLOv5 and PyTorch in Google Colab. Trained on a custom dataset to detect five lane conditions, enabling real-time traffic monitoring with scalable, low-cost deployment in smart city environments.

Nexora - business portfolio website

Built Nexora, a responsive Bootstrap-PHP portfolio website for a digital solutions company featuring a consultation booking form with PostgreSQL integration, admin login with dashboard for appointment management, testimonial carousel with dynamic database content, and AJAX-enhanced form submission for seamless user experience.
